SKILLS SUMMARY

Languages:	Python, JavaScript, C++, Java
Frameworks:	HTML, CSS, Pandas, NumPy, Matplotlib, Scikit-learn
Libraries & Tools:	Power BI, EDA, Excel, Data manipulation, Data Acquisition, PostgreSQL, SQL Queries, Git & GitHub, REST APIs / JSON
Data Engineering:	ETL, Data Warehousing, Data Modeling, Star Schema, DAX, Data Pipelines, Data Validation
Soft Skills:	Problem Solving, Cognitive Thinking, Communication Skills, Project Management, Work Ethic

PROJECTS

WhenTho – AI Revenue Recovery Model

Sept' 26

- Designed a LightGBM classifier predicting invoice payment risk (on-time/late/very late) achieving 0.88+ weighted F1
- Automated multi-channel Razorpay UPI recovery workflows with Gemini 2.5 Flash tone-calibrated follow-up generation
- Constructed a 30-day risk projection timeline with Promise-to-Pay tracking and continuous model retraining loop
- Tech: Python, FastAPI, LightGBM, React, Razorpay APIs, Gemini API, Scikit-learn, Pandas
- GitHub Repository: [LINK](#), Vercel: [LINK](#)

Trip-Split - Group Travel Expense Tracker:

Jun' 26 – Jul' 26

- Applied knapsack DP to optimize hotel, restaurant & activity selection via Overpass API, maximizing experience score within budget
- Split costs fairly across group members using a debt-resolution algorithm minimizing total transactions
- Integrated FastAPI backend with Gemini API fallback for venue scoring and utility normalization
- Tech: Knapsack DP, Next.js 14, TypeScript, Tailwind CSS, Supabase, PostgreSQL, FastAPI
- GitHub Repository: [LINK](#), Vercel: [LINK](#)

GigShift – B2B2C Gig-Economy Dispatch Platform:

Apr '26 – May' 26

- Designed a dispatch platform connecting delivery companies with last-mile riders across India
- Developed distinct Next.js applications tailored for riders, platform operators, and ops teams, increasing user engagement across all three segments by 30%
- Engineered a 10,000-row seeded synthetic dataset with realistic surge patterns (peaks, weather, event boosts) to simulate live dispatch intelligence
- Tech: Role-Based Access, B2B2C Platform, Greedy Algorithms, Priority Queue, Graph Traversal (BFS/Dijkstra)
- GitHub Repository: [LINK](#), Vercel: [LINK](#)

Data Analytics: Crop Production in India - Agricultural Data Analysis:

Mar' 26 – Apr' 26

- Analyzed agricultural data of two decades to uncover crop production trends across Indian states and seasons
- Constructed an interactive Power BI dashboard with slicers, KPI; key findings: top-producing state, dominant crop, season's highest-yield
- Built ETL pipeline to source, clean, and transform district-wise agricultural data from data.gov.in, with DAX-powered measures for yield, growth rate, and seasonal contribution and seasonal contribution percentage
- Tech: Power BI, EDA, Data Visualization, ETL, Data Transformation

AQI Analysis and Prediction: Air Quality Analysis & ML Model:

Mar' 26 – Apr' 26

- Conducted end-to-end EDA on India's AQI dataset to identify pollution patterns across cities and seasons
- Designed a data cleaning, transformation, and validation pipeline across pollutant features, then developed a Linear Regression model to predict AQI values
- Performed feature correlation analysis to isolate dominant pollutant contributors driving seasonal AQI spikes
- Tech: Python, Pandas, Scikit-learn, Matplotlib, Machine Learning, EDA
- GitHub Repository: [LINK](#)

IPC Debugger - GUI-Based Inter-Process Communication Tool:

Dec' 25

- Built a GUI-based Inter-Process Communication debugger for system-level troubleshooting
- Implemented concurrent monitoring of three IPC channels — pipes, message queues, shared memory — with real-time status inspection
- Enabled live channel state visualization, supporting dynamic attach/detach across active processes
- Tech: Python, GUI Development, Systems Programming, IPC
- GitHub Repository: [LINK](#)

CERTIFICATES

• AI Database Certified Foundations Associate - Oracle	Aug' 26
• Agentic AI Certified Foundations Associate - Oracle	Aug' 26
• C++ Programming Language - Infosys	Jul' 26
• Database Management System – Infosys	Jul' 26
• Programming in Java - Neocolab	May' 26
• Data Structure and Algorithm - Neocolab	Jan' 26
• Object Oriented Programming - Neocolab	Jan' 26
• C Programming - Neocolab	May' 25
• Introduction to AI & ML - Skillera	Apr' 25
• Introduction to DSA – Skillera	Apr' 25

ACHIEVEMENTS

-
- **Research Paper (under review):** Apr' 26
Co-authored a peer-reviewed paper on non-generative AI and semantic classification for real-time idea tracking, achieving 82.6% classification accuracy
 - **TED-Ed Talk:** Sep' 22
Delivered a student talk on "Healthy Criticism" covering constructive feedback frameworks and perspective-taking

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.40	Since Aug' 24
S.D.A Sr. Sec. School	Bhilwara, Rajasthan
Intermediate; Percentage: 73%	Apr' 23 – Mar' 24
S.D.A Sr. Sec. School	Bhilwara, Rajasthan
Matriculation; Percentage: 88%	Apr' 21 – Mar' 22
